

Premium Heating Service Insurance Program

P.O. Box 690
North Conway, NH 03860-0690
1-800-600-4728
www.whitemountainoil.com

This Premium Heating Service Insurance Program includes the repair or replacement, at the option of White Mountain Oil & Propane, of any covered part failure and related labor charge for one full year commencing May 1st. **This Premium Policy entitles the customer to "on-call" emergency heating service, 24 hours a day, 7 days a week. This policy will also include a tune-up and efficiency adjustment to be completed during the policy year.**

Annual Burner Tune-Up

White Mountain Oil & Propane will clean the combustion chamber and boiler or furnace flues. We will clean and inspect the chimney connector in the furnace/boiler area. Where applicable, we will clean and oil the blower or circulator motor, inspect and replace air filters (up to 1") and oil filters. On oil systems, we will clean, inspect, and replace when needed: nozzle, strainer, cad cell, and adjust air and fuel pressures for economical and efficient operation. On propane systems, we will clean and test the ignitor assembly and adjust gas/air mixture for maximum combustion efficiency. Manufacturer's recommendations for annual maintenance will be used as a guide, as well.

GENERAL CONDITIONS

1. **Calls Not Covered:** All calls resulting from failure due to fire, flood, lightning, power failure, blown fuses, power surges, switches off, low water or low water pressure in boiler, improper setting of thermostat or warning device (including WiFi), occupant's neglect or accident pertaining to the heating system or other conditions deemed acts of God or beyond our control will not be covered and labor will be charged at our prevailing day rates. Freeze damage caused by heat failure is also not covered by this insurance program.
2. This Premium Policy includes the coverage of the Standard Policy as well as additional components outside the heating appliance jacket to include:
 - (1) Basic 24 Volt Thermostat (Wi-Fi thermostats are not covered)

Circulators	Circulator Control Relays
Zone Valves Power Heads	Zone Control Relays
Transformers (24V)	Heating Expansion Tank
Boiler Water Feeders	Low Water Cut-Offs
Boiler Backflow Preventer	Hi-Vents

Domestic hot water tanks, heaters or coils, power venters, draft inducers, stack relays, any vent materials, piping, including baseboard, or condensate are excluded from this policy. Also excluded are the boiler sections, combustion chamber, heat exchanger, and the jacket itself. Addition of anti-freeze to hydronic systems is not covered but is available at an extra charge. (Please see Hydronic Anti-Freeze Option form).

In situations where there are multiple heating systems, this insurance policy covers the designated heat source in the main living space only or the specified unit. Multiple units tied together require multiple policies.

3. Program is valid for all residential units and limited commercial units up to 200,000 BTU individually.
4. Upon change of ownership (after July 31st or usage), this policy can be transferred for a fee of \$50.
5. Policy requires White Mountain Oil & Propane to be the exclusive provider of fuel to the covered appliance.
6. Policy automatically renews each May, unless canceled by customer, or White Mountain Oil & Propane.
7. Policy renewals may be canceled by customer by July 31st after the policy's inception and cannot be refunded after August 1st or after any usage of the insurance plan.
